Quality Control Specialist PVL 82558

**Education:** A Bachelor’s degree is required. Preferably in biochemistry, chemistry, molecular biology, bacteriology, virology or a related field.

**Appointment Percentage:** 100%
Full Time Salary Rate: minimum $38,000 annual – depending on qualifications.

**Number of Positions:** 1

**Qualifications:**
Well-qualified applicants will have the following preferred experience or knowledge:
Two-three years of experience working in a laboratory setting under Good Laboratory Practices (GLP) or current Good Manufacturing Practices (cGMP), or a Master’s degree with relevant coursework and/or research experience; Technical and hands-on experience performing or using analytical methods and optimization, including UV-Vis spectroscopy, protein analytical methods, for example, sodium dodecyl sulfate polyacrylamide gel electrophoresis (SDS-PAGE), isoelectric focusing (IEF), Western Blot, high-performance liquid chromatography (HPLC), polymerase chain reaction (PCR), flow cytometry and cell culture based assays; Experience in microbiological methods (environmental monitoring, sterility testing, microbial isolate identification), and endotoxin testing; Demonstrated successful experience coordinating components of projects, including managing budgets and reporting team activities, with good communication and problem-solving skills; Experience with equipment operation and/or the flexibility and desire to learn operation of new equipment; Self-motivated with an enthusiastic, positive attitude, and excellent multi-tasking skills; and the ability to work effectively both independently and in a fast-paced, client-oriented, team environment.

**Job Summary:**
Waisman Biomanufacturing's QC specialists work together with Manufacturing and Quality Assurance Teams to test biopharmaceutical products and document results for in-process and release testing. QC specialists are responsible for running standard assays and working with others on the team to develop project-specific assays. This position is responsible for acting as the QC lead representative on projects with clients, including managing & disseminating information & reports and managing a portion of the budget for those projects. In addition, QC Specialists are responsible for writing and updating standard operating procedures (SOPs), and reporting quality control specifications (QCSs), and reviewing/verifying the work of teammates. More specific requirements are listed below.
