- Strong working knowledge in development, validation, execution and monitoring of biopharmaceutical manufacturing operations is **preferred**.
- Expertise in developing, validating, and executing Quality Control assays and sampling programs is **preferred**.

**Job Summary:**
Waisman Biomanufacturing (WB), at the University of Wisconsin-Madison is a pilot-scale manufacturing facility that produces biotherapeutics for Phase I and Phase II Human Clinical Trials according to the Food and Drug Administration's (FDA's) current Good Manufacturing Practice (cGMP) guidelines. Clients include small and large biotechnology companies, in addition to academic investigators.

The Assistant Manager of Quality is responsible for ensuring compliance with the FDA’s current Good Manufacturing Practice (cGMP) guidelines for the manufacture of biologics and pharmaceuticals, under the supervision of Quality Manager, and in conjunction with the Director and the Manager of Operations. This position is responsible for maintaining the quality assurance/quality control program, updating the quality program as needed, participating in validation activities, reviewing documentation, preparing reports, training personnel, and serving as facility quality assurance liaison with the FDA and project sponsors, including during audits.
