Research Specialist – PVL 88802

**Education:** Bachelor’s Degree required, preferably in physical or biological science, or engineering

**Appointment Percentage:** 75% - 100%

**Full Time Salary Rate:** minimum $30,207 annual – depending on qualifications.

**Number of Positions:** 1

**Minimum Number of years or type of relevant work experience:**

Well qualified applicants will have the following preferred work experience:

- Knowledge in area of PET imaging.
- Prior experience working with analytic equipment.
- Excellent oral and written communication skills.
- Excellent organization skills and attention to detail.
- Excellent interpersonal skills.
- Computer proficiency and expertise using Microsoft Office software.
- Experience in Matlab programming for basic image analysis.

**Job Summary:**

The Christian Laboratory's research focuses on developing and translating novel positron emission tomography (PET) methods for the study of neuropsychiatric illness. This involves using PET methodologies to investigate neurochemical changes in the brain and studying novel radioligands to characterize neurotransmitter-protein interactions and how they are influenced by the effects of psychotropic drugs. This position will be engaged in the use of analytic scientific equipment and with creating standard operating procedures and documenting testing results. Additionally, duties will include performing basic medical imaging analysis and image processing.

For a complete list of duties and qualifications please see:

We offer an excellent benefits package as well as a competitive salary based on qualifications.
