

national
MEDICAL HOME
Autism Initiative

national conversation
to explore possible
Disparities in Autism Diagnosis

Conversation Objectives:

- Convene a community of learners to participate in a discussion of:
 - 1) the impact of culture and socio-economic status on differences in developmental and behavioral expectations for young children
 - 2) the possible reasons for disparities in the diagnosis of Autism in culturally and ethnically diverse groups
 - 3) the role of medical home in screening and support
- Increase awareness and understanding of cultural disparities in autism and the essential role of medical home in addressing disparities through screening initiatives

Sponsored In Partnership With The National Center For Cultural Competency
